ORDERING and SHIPPING INSTRUCTIONS

Failure to properly prepare and package instruments leaves those who handle the packages at risk of accidental puncture wounds and blood-borne illnesses.

1) Sterilize  Instruments must be sent in sterilization packages with verification strips.

2) Complete Order Form

Fill out the order form stating the instruments you are ordering. Be specific to ensure you receive what you want (e.g. Gracey 13/14, not 13/14). It is NOT necessary to indicate what you are sending. If you like, you can separate groups before you sterilize. Don't forget to circle the working end width as Standard or Thin.

3) Properly package

Package bagged instruments and order form securely with significant packing in a sturdy box to avoid movement of instruments. Please include packing around the ends (paper towels or paper from recycling works well).

4) Shipto: **Progressive Edge Dental Services Inc.**
#200, 60 Industry Way SE
Calgary, AB, Canada
T3S 0A2
